EXECUTIVE PROFILE

Digital Transformation and Technology Programme Leader with over seven years of experience driving technology-enabled transformation, digital innovation, cloud adoption, AI solutions, and enterprise modernization initiatives across Africa, Europe, and North America.
Experienced in translating organisational and programme objectives into practical digital strategies, technology roadmaps, and scalable implementation plans. Strong background in leading cross-functional teams, managing complex digital ecosystems, coordinating technology vendors and partners, and delivering multi-stakeholder initiatives across banking, fintech, government, healthcare, telecommunications, aviation, and enterprise sectors.

Currently leading international digital technology delivery initiatives at Clickatell USA, supporting the deployment of AI-powered customer engagement and digital communication solutions across WhatsApp, SMS, USSD, and conversational platforms. Experienced in designing and coordinating technology solutions that improve accessibility, service delivery, operational efficiency, customer engagement, and digital adoption.

Previously led and supported enterprise cloud migration, infrastructure modernization, AI innovation, and digital transformation programmes at Datamellon and Makintouch Consulting. Has worked extensively with AWS, Google Cloud, digital platforms, automation technologies, and emerging technology solutions.

Brings strong experience in multi-country programme coordination, technology strategy, stakeholder engagement, vendor management, capacity development, and digital adoption. Has trained and mentored over 4,000 professionals across Africa in cloud computing, digital technologies, Agile methodologies, project management, and emerging technology adoption. Combines an academic foundation in Agricultural Engineering with extensive technology and digital transformation experience, bringing a unique perspective to the application of digital innovation, data-driven solutions, capacity development, and technology-enabled systems to support organisational transformation and sustainable development.

CAREER HIGHLIGHTS

- Over 7 years of experience leading digital transformation, technology innovation, cloud adoption, AI, and enterprise modernization initiatives across Africa, Europe, and North America.
- Experience coordinating complex, multi-stakeholder technology programmes across multiple countries and industries.
- Developed and implemented technology delivery roadmaps and transformation initiatives aligned with organisational objectives, operational requirements, and user needs.
- Currently lead international digital technology delivery initiatives at Clickatell USA involving AI-powered customer engagement, WhatsApp, SMS, USSD, and conversational technology platforms.
- Strong experience designing and managing digital ecosystems involving multiple platforms, technology teams, vendors, enterprise systems, and stakeholders.
- Led and coordinated cross-functional teams of 40+ engineers, developers, cloud architects, business analysts, consultants, and technology specialists.
- Supported digital solutions that improve accessibility and inclusion through mobile-first technologies including USSD, SMS, and WhatsApp.
- Strong experience managing technology vendors, cloud service providers, software platforms, project budgets, subscriptions, implementation partners, and technology delivery contracts.
- Trained and mentored over 4,000 professionals across Africa in cloud computing, digital technologies, Agile methodologies, project management, and emerging technologies.
- Strong background in AWS, Google Cloud, Artificial Intelligence, Generative AI, digital platforms, automation, enterprise systems, and technology innovation.

CORE COMPETENCIES

- **DIGITAL STRATEGY & TRANSFORMATION**

Digital Transformation Strategy • Technology Roadmaps • Digital Innovation • Digital Ecosystems • Technology Modernisation • Digital Adoption • Process Digitisation • Emerging Technology Strategy

- **DIGITAL PLATFORMS & TECHNOLOGY**

Artificial Intelligence • Generative AI • Cloud Computing • Digital Platforms • Mobile Technologies • SMS Platforms • USSD • WhatsApp Business Platforms • Conversational AI • Automation

- **PROGRAMME & TECHNOLOGY MANAGEMENT**

Multi-Country Programme Delivery • Digital Programme Management • Technology Portfolio Management • Implementation Roadmaps • Vendor Management • Procurement Support • Technology Governance • Budget Planning • Risk Management

- **DATA & DIGITAL SYSTEMS**

Digital Information Systems • Data Integration • Digital Reporting • Technology Dashboards • Data Governance • Data Protection • Cybersecurity Awareness • Digital Performance Monitoring

- **LEADERSHIP & CAPACITY BUILDING**

Technology Leadership • Cross-functional Team Leadership • Digital Skills Development • Capacity Building • Stakeholder Engagement • Partnership Management • Coaching • Technology Adoption

PROJECT MANAGER – DIGITAL TRANSFORMATION & TECHNOLOGY DELIVERY

Clickatell USA | 2025 – Present

Lead the planning and delivery of enterprise digital transformation and customer engagement initiatives across Africa, Europe, and North America.

Key Responsibilities

- Lead the implementation of digital technology solutions across multiple countries, working with enterprise clients, technical teams, technology partners, and business stakeholders.
- Coordinate the design, deployment, testing, integration, and continuous improvement of digital customer engagement platforms.
- Support organisations in digitising customer service and business processes using WhatsApp, SMS, USSD, conversational AI, and automation technologies.
- Translate business and user requirements into structured technology roadmaps and implementation plans.
- Coordinate cross-functional teams comprising developers, engineers, solution architects, business analysts, product teams, and external stakeholders.
- Manage technology delivery risks, dependencies, quality assurance activities, and implementation timelines.
- Coordinate multiple digital platforms and integrations to ensure reliable and seamless service delivery.
- Work with technology partners and vendors to support solution implementation, platform functionality, service quality, and customer requirements.
- Support digital solutions designed to increase service accessibility through mobile-first and low-barrier technologies such as USSD and SMS.
- Facilitate stakeholder engagement and ensure technology investments remain aligned with organisational priorities and expected outcomes.

Selected Digital Transformation Initiatives

Stanbic IBTC – Digital Banking Transformation

Supported the transition of customer services from traditional USSD channels towards a modern conversational banking platform on WhatsApp.

Fidelity Bank – Digital Customer Engagement

Supported the implementation of digital banking and conversational customer engagement technologies.

Platinum Health – Digital Healthcare Platform

Coordinated the implementation of a WhatsApp-based digital patient engagement ecosystem supporting customer service, forms, membership services, and healthcare interactions.

Lift Airline – Digital Passenger Experience

Supported the implementation of a WhatsApp-based self-service platform enabling digital check-in and passenger support.

Project Manager | Datamellon UK.

2024

- Led the planning and delivery of digital transformation and cloud modernization programmes.
- Worked with organisations to assess technology requirements and develop practical cloud and digital transformation roadmaps.
- Coordinated the migration and modernization of enterprise workloads across AWS and Google Cloud Platform.
- Led cross-functional teams of 40+ cloud engineers, developers, solution architects, business analysts, consultants, and external stakeholders.
- Established programme governance, risk management, performance monitoring, and reporting structures.
- Managed technology vendors, cloud service providers, and implementation partners.
- Supported organisations in improving technology efficiency, scalability, security, and operational resilience.
- Coordinated AI, cloud, digital infrastructure, and enterprise modernization initiatives.
- Managed programme budgets, resource planning, forecasting, and technology delivery performance.
- Supported Agile and iterative approaches to technology implementation and continuous improvement.

Relevant Transformation Projects

Include these:

- FIRS Digital Employee Onboarding Platform.
- LSDPC Digital Transformation.
- Sterling Bank AI Fraud Detection.
- PiggyVest Cloud Migration.
- GTWorld Cloud Migration.
- Henry Jackson Foundation FinOps.
- Telecel Ghana Cloud Transformation.

Lead Programme Manager- Digital Innovation & Capacity Development | Makintouch Consulting Nigeria.

2022-2023

- Led digital technology and cloud adoption programmes for organisations and professionals across Africa.
- Designed and delivered capacity-building initiatives focused on cloud computing, digital transformation, emerging technologies, and technology adoption.
- Managed strategic relationships with global technology partners, including AWS, Microsoft, and Google Cloud.
- Coordinated cross-functional teams delivering technology programmes and digital innovation initiatives.
- Supported organisations in identifying opportunities to adopt cloud, AI, and emerging technologies.
- Developed implementation plans, programme roadmaps, and technology adoption strategies.
- Delivered technical workshops, training programmes, and technology awareness initiatives.
- Managed programme stakeholders, partners, vendors, and participating organisations.
- Mentored technology professionals and project teams.

Digital Capacity Building and Technology Adoption

- Trained and mentored over 4,000 professionals across Africa in cloud computing, AWS technologies, project management, Agile methodologies, IT service management, business analysis, and digital technologies.
- Designed and delivered technology workshops, training programmes, and capacity-building initiatives for professionals, organisations, and technology communities.
- Supported individuals and organisations in adopting emerging technologies and translating technical concepts into practical business applications.
- Experienced in engaging technical and non-technical audiences and improving technology literacy among diverse stakeholder groups.
- Active contributor to technology communities and capacity development initiatives across Africa.

SELECTED ENTERPRISE PROJECTS

Client	Project	Outcome
FIRS	Digital Employee Onboarding Platform	Digitized employee onboarding for **200,000+ personnel**, reducing manual processing and improving operational efficiency.
LSDPC	Real Estate Digital Transformation	Digitized the property acquisition, allocation, mortgage, and customer onboarding processes, improving customer experience and operational efficiency.
Stanbic IBTC	Digital Migration Programme	Successfully migrated enterprise digital services to a modern platform, improving scalability, reliability, and customer engagement.
Fidelity Bank	USSD & ChatFlow	Enabled seamless migration from USSD to conversational banking on WhatsApp, improving customer engagement and digital service delivery.
Henry Jackson Foundation	Finops & Cloud Cost Optimization	Identified cloud optimization opportunities and established FinOps practices to improve cost visibility and operational efficiency.
PiggyVest	Cloud Migration & Modernization	Modernized cloud infrastructure to improve application performance, scalability, security, and operational resilience.
GTWorld	Cloud Migration	Led cloud migration activities that enhanced infrastructure reliability, scalability, and business continuity.
Sterling Bank	AI Fraud Detection Platform	Delivered an AI-powered fraud detection solution to strengthen transaction monitoring and improve fraud prevention capabilities.
Telecel Ghana	Cloud Migration and Modernization	Cloud transformation
Platinum Health South Africa	WhatsApp Digital Patient Engagement Platform	Delivered a secure digital patient engagement solution on WhatsApp, improving customer support, appointment management, and healthcare service accessibility for 100,000 + Individuals
Lift Airline South Africa	WhatsApp Passenger Self-Service Platform	Delivered a WhatsApp-based self-service solution enabling digital flight check-in and customer support, enhancing passenger experience and operational efficiency.

LEADERSHIP & COMMUNITY

- Leader - **AWS Cloud Security User Group West Africa**
- Innovation Lead **– Slum2School Africa**
- Volunteer Project Manager – **African Union 6th Region** Canada
- Senior Project Coordinator – **Abivah Foundation-** USA.

EDUCATION

MBA Project Management (In Progress) – Rome Business School
PGD Information Technology (In Progress) – National Open University of Nigeria
Agricultural Engineering – Federal College of Agriculture

CERTIFICATIONS

AWS Cloud Practitioner
AWS Solutions Architect Associate
AWS Solutions Architect Professional
Google Professional Cloud Architect
Google Certified Project Management
Certified Agile Scrum Master
IBM Enterprise Design Thinking Practitioner
Business Growth with AI - Project Management Institute (PMI)
